

CSC343

Group Project

Name
Ahmad Abdulaziz Al-sohail
Ayham Abdullah Al-Faraihi
Abdullah Yousef Al-Ghussen

Functional Requirements:

1. System should be able to add Cities.
2. System should be able to update Cities.
3. System should be able to delete Cities.
4. System should be able to view Cities.
5. System should be able to add Areas.
6. System should be able to update Areas.
7. System should be able to delete Areas.
8. System should be able to view Areas.
9. System should be able to add Lanes.
10. System should be able to update Lanes.
11. System should be able to delete Lanes.
12. System should be able to view Lanes.
13. System should be able to add Buildings.
14. System should be able to update Buildings.
15. System should be able to delete Buildings.
16. System should be able to view Buildings.
17. System should be able to add Apartments.
18. System should be able to update Apartments.
19. System should be able to delete Apartments.
20. System should be able to view Apartments.
21. System should be able to add Stores.
22. System should be able to update Stores.
23. System should be able to delete Stores.
24. System should be able to view Stores.
25. System should be able to add Residents.
26. System should be able to update Residents.
27. System should be able to delete Residents.
28. System should be able to view Residents.
29. System should be able to add Managers.
30. System should be able to update Managers.
31. System should be able to delete Managers.

- 32. System should be able to view Managers.
- 33. System should be able to report Information of people living in a particular apartment.
- 34. System should be able to report Address of some resident.
- 35. System should be able to report Information of all malls.
- 36. System should be able to report Information of all Masjids.
- 37. System should be able to report Information of a stores.

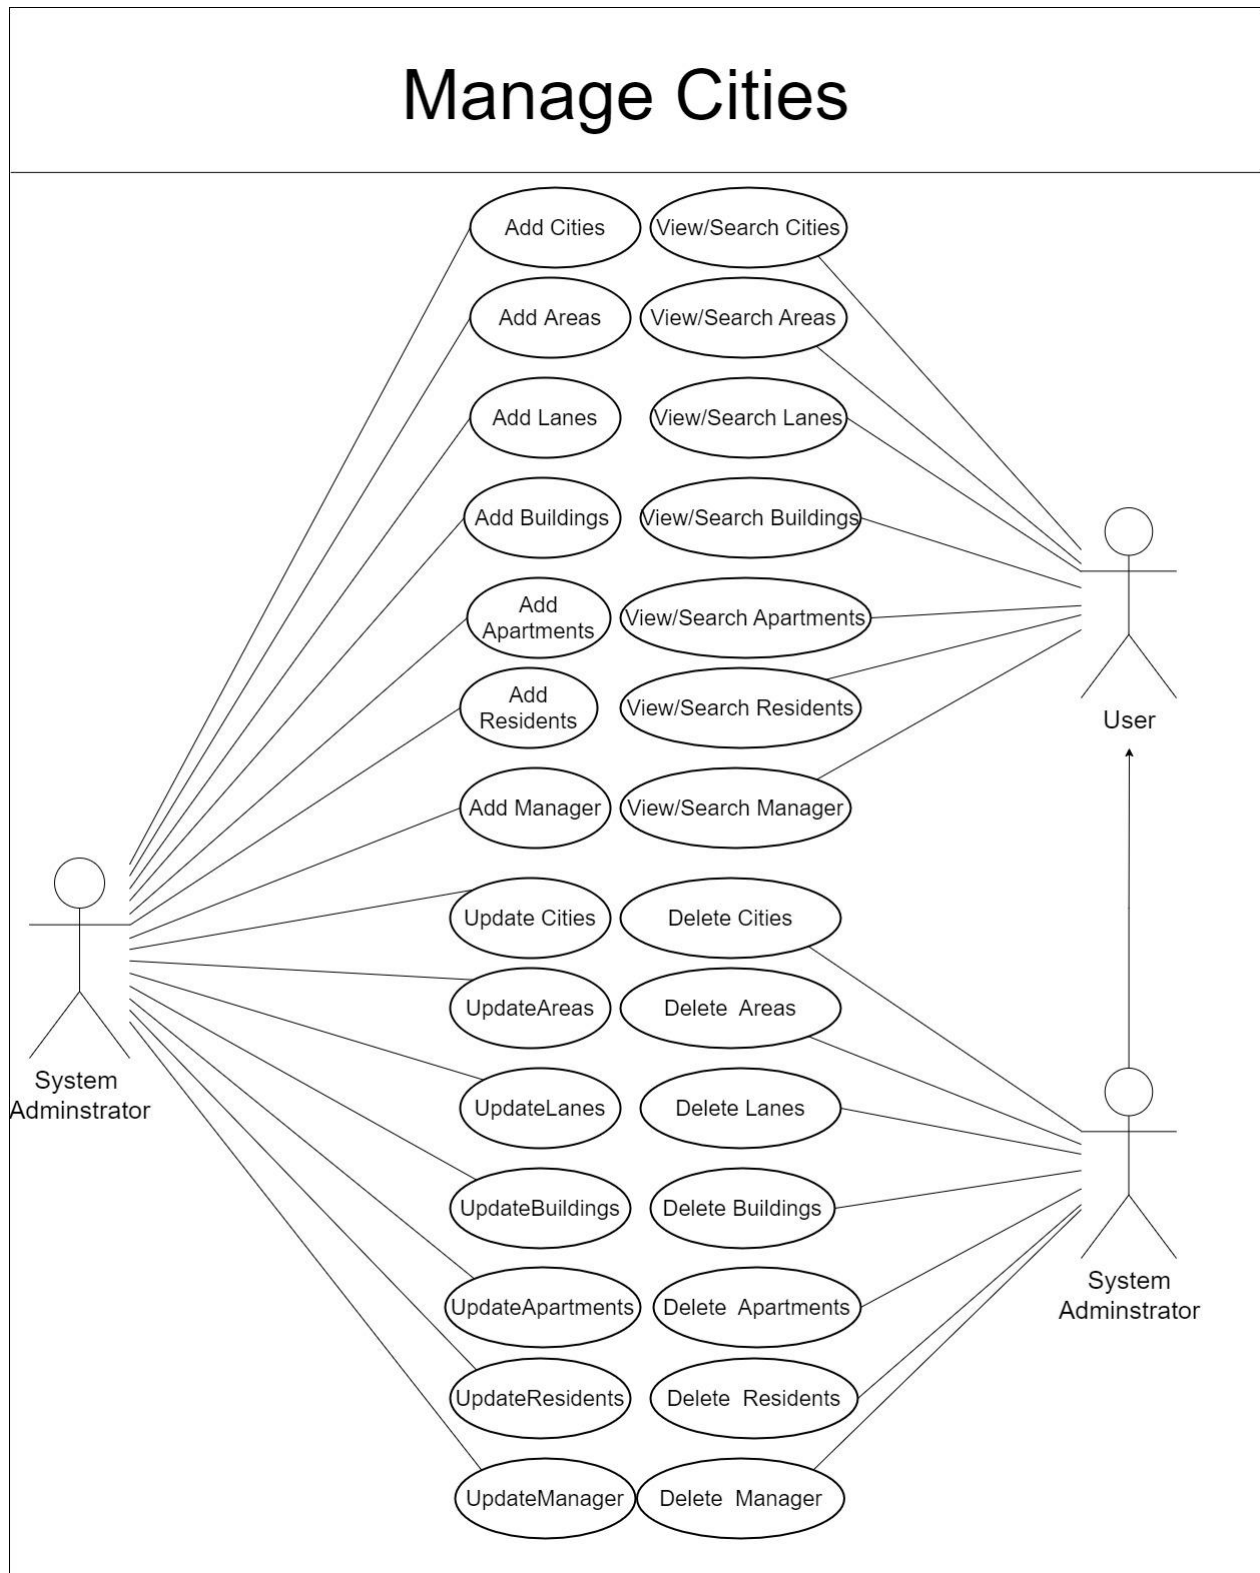

Non-Functional Requirements:

- 1. The project system should be developed using c#.
- 2. The system database should be developed using mySQL.
- 3. The system should support both Arabic and English language.
- 4. The system should be supporting both windows 10 and mac Operating Systems.
- 5. The system should be available to users all the time.

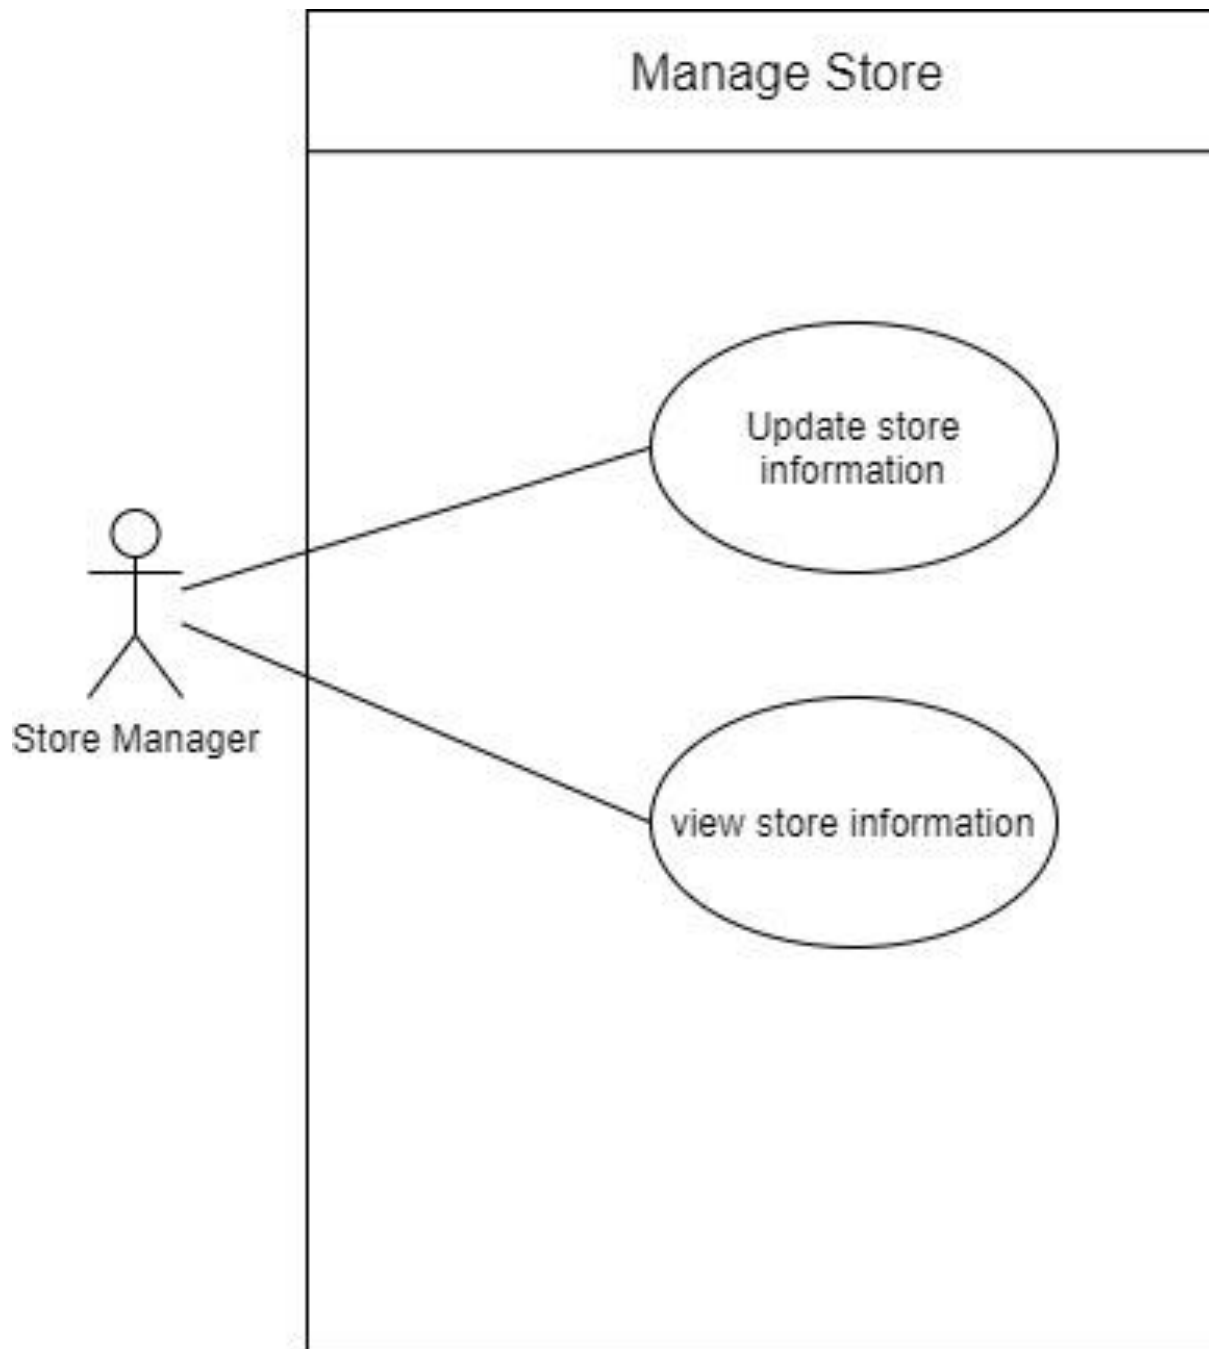

Actor Goal:

Actor	Goal
System Administrator	Add information. update information. delete information. view information.
Store Manager	Update store information View the store info
User	View information

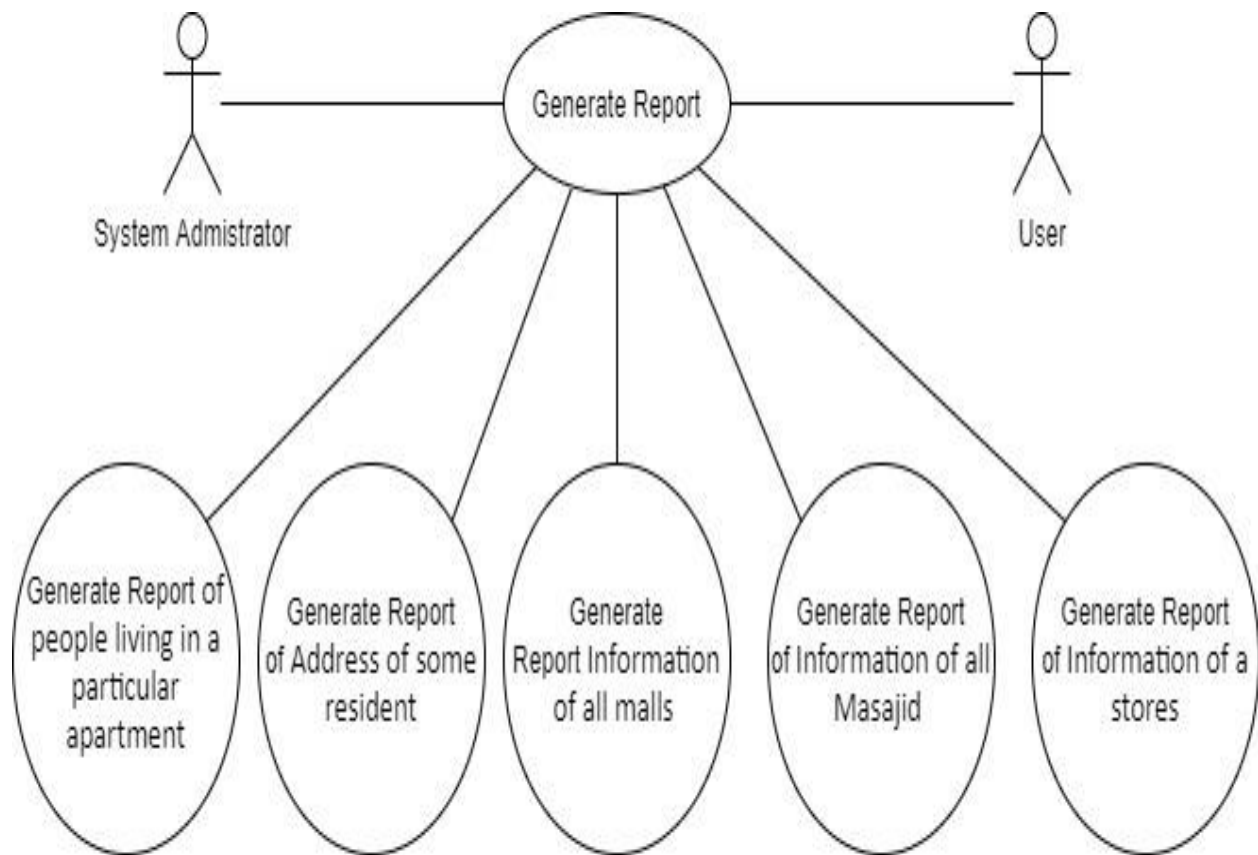

Use-Case Diagram:

Manage Store:

Generate Reports Detailed Use Case:

Use Case Text Descriptions:

1. ADD Resident:

Actor:	System Administrator.
Precondition:	The Resident does not already exist, and the number of people in the apartment is less than 5.
Post condition:	The Resident has been added to the apartment.
